

1.Simple Enum Example which defines Day enum and displays them.

```
package com.tcs.ilp.enumdemo;

public enum DayEnum {

    SUNDAY, MONDAY, TUESDAY, WEDNESDAY, THURSDAY, FRIDAY, SATURDAY

}
```

```
package com.tcs.ilp.enumdemo;

public class DayEnumExample {

    public static void main(String args[])
    {
        for(DayEnum day: DayEnum.values())
```

```

        System.out.println(day.name());
    }

}

```

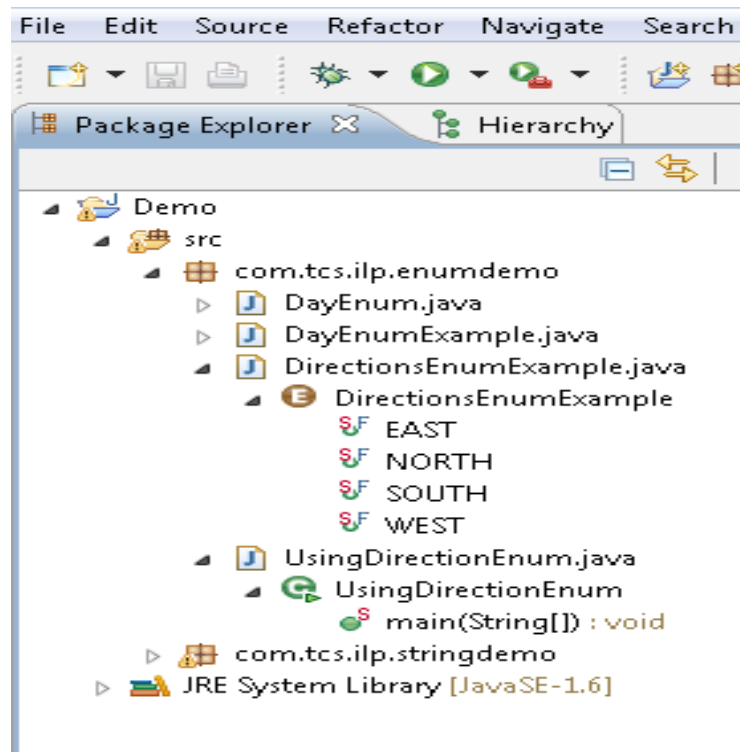

Output:

```

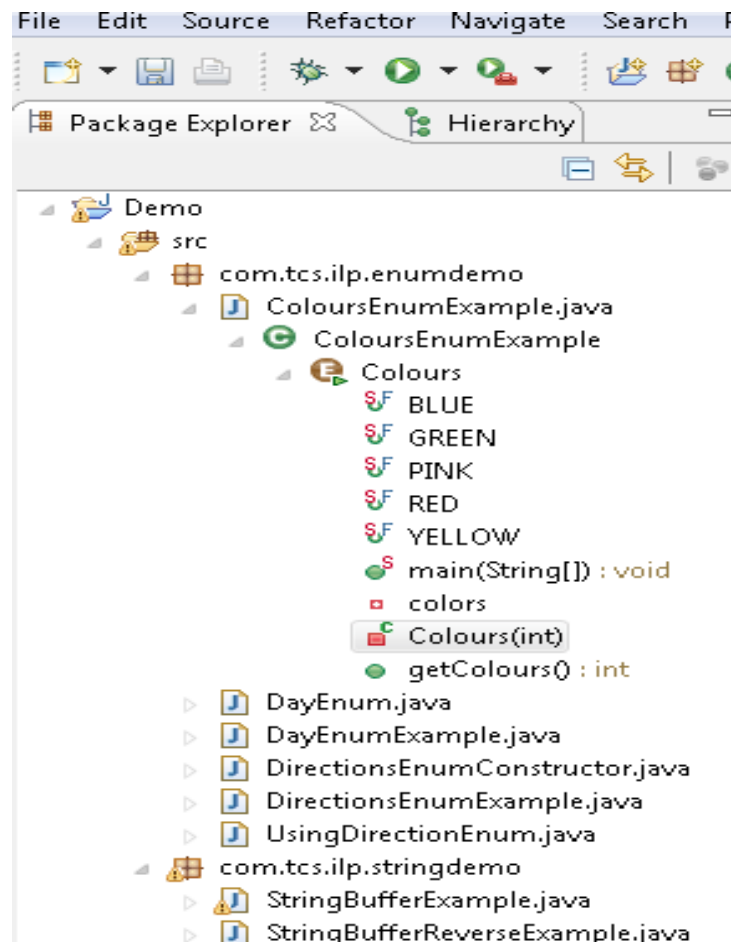

SUNDAY
MONDAY
TUESDAY
WEDNESDAY
THURSDAY
FRIDAY
SATURDAY

```

2.Create a Direction enum and display the values.Outline for the same is shown below:

3.Enum Example using Constructors and methods.

4.Create Direction Enum using constructor. Outline for the same is shown below:
